

Providing the best  
**Website & Logo Designs**  
in the industry.

## 2015 Cyber Security and Website Creation Initiative

Recent legislation (Chapter 235 of the Acts of 2014) requires Massachusetts Housing Authorities to post information on their websites including contact information, annual plans, and certain program and financial reports. This legislation has also established funds for Massachusetts Housing Authorities to upgrade computer systems and online services. Take advantage of these funds and upgrade your current hardware, software, website, and email now.

This is the perfect opportunity for us to help you create your own custom website and email addresses, and eliminate Verizon, Comcast, and AOL email accounts!

### 90+ Languages

The Department of Housing and Urban Development (HUD) requires translation of Housing Authority websites into Spanish. HUD also requires that websites can be easily read by the visually impaired. Our websites feature plain text and Google Translate Plugins, which allow visitors to translate the website into over 90 different languages, including Spanish, with a single click of the mouse!

### Logo Design

Your logo is your business face to the world. Create a lasting public presence with a custom logo designed by our experts. Our experts will work closely with you to create a clever design that matches your vision for your organization.

### Exchange Email

Upgrade your outdated email system to Microsoft Exchange. Exchange users can take advantage of collaborative features to schedule meetings, reserve conference rooms, share tasks and global address lists, and manage calendars. Mobile access is available from all phones that can receive email, including Windows Phone, iPhone®, Android, and Blackberry devices.
